

Missouri Division of Behavioral Health

Access to treatment services for individuals and families impacted by gambling is a priority of the Missouri Department of Mental Health-Division of Behavioral Health. The Department contracts with certified gambling disorder counselors across the state to provide treatment services.

No cost treatment is possible as a portion of casino admission fees is allotted to the state. To receive services, individuals must be 18 years of age, be a resident of the state of Missouri, and meet admission criteria.

Services available to those impacted by gambling include individual counseling, group counseling and family therapy. Family members affected by a problem gambler can also receive treatment services.

Individuals seeking referral to a counselor in a specific area can view a list of Missouri certified compulsive gambling counselors online at: [Compulsive Gambling Treatment Services/Certified Counselors](#) or through the helpline at 1-800 GAMBLER.
